TECHNICAL SKILLS

- **Programming:** C, C++, Java, Python
- **Web Tech:** HTML, CSS, JavaScript
- **Mobile:** Flutter
- **UI/UX:** Figma
- **Database:** SQL
- **Office Tools:** MS Word, PowerPoint, Excel
- **Core Areas:** OOP, Data Structures & Algorithms, DBMS, Digital Logic Design

LANGUAGES

- Bangla: Native
- English: Working Proficiency
- Hindi: Conversational

STRENGTHS

- Willingness to Learn
- Problem-Solving
- Team Collaboration
- Self-Motivated
- Adaptability & Quick Learner

CAREER OBJECTIVE

A motivated Computer Science and Engineering undergraduate seeking opportunities to apply academic knowledge and develop practical skills in software development and information technology. Interested in mobile and web development, programming, databases, UI/UX design, and problem solving. Eager to learn new technologies, work collaboratively, and contribute effectively to professional projects.

EDUCATION

B.Sc. in Computer Science & Engineering

Bangladesh Army University of Science and Technology (BAUST), Saidpur [Current Level: 3-I | CGPA: 3.62]

Higher Secondary Certificate (HSC)

Govt. Shah Abdur Rouf College | Science Group [2023 | GPA: 4.92 / 5.00]

Secondary School Certificate (SSC)

Pirganj Government High School | Science Group [2021 | GPA: 5.00 / 5.00]

CURRENT ACADEMIC PROJECTS

NeighborCart — Software Development Project

- Developing a Flutter-based application as part of the Software Development course.
- Currently learning Flutter and applying software development practices throughout the project.
- Using Figma for user-interface and UI/UX design.

Microcontroller-Based Driver Drowsiness Detection

- Building a microcontroller-based safety system for detecting driver drowsiness (Microprocessor course).
- Designed to detect signs of driver fatigue and trigger automated vehicle safety responses.

PREVIOUS ACADEMIC PROJECTS

Smart City Transport Management System

- Designed a web-based system for managing transport schedules, routes, passengers, and ticketing.
- Worked with HTML, CSS, JavaScript, Node.js, and Microsoft SQL Server.
- Included features such as fare calculation, seat availability, and ticket exchange.

Medical Assistant Toolkit

- Developed a Java-based desktop application concept with database integration.
- Focused on useful medical-assistance features and organized data management.

Automatic Room Light & Daylight Controller

- Developed an academic hardware project using Arduino Nano, IR sensors, LDR, relay, and a 7-segment display.
- Implemented visitor counting and automatic lighting based on room occupancy and daylight conditions.

CV Builder System

- Developed a desktop-based CV creation system using Java Swing.
- Used OpenPDF for document generation and Gson for data handling.
